Attorney's Docket No.: 03058-004002

In the claims:

Please amend the claims as follows:

Claims 1-71 are canceled without prejudice.

H1  
72. (previously amended) A method in which a user of a commodity records value information on a client device about the commodity that is based on use of the commodity, the client device sends the information to a server for storage, the client device receives from the server additional value information recorded by other users, in response to an event based on the user's interaction with the commodity, and the client device presents the additional value information to the user in the course of the user's interaction with the commodity.

Claims 73-89 are canceled without prejudice.

90. (previously added) The method of claim 72 in which the device comprises software.

91. (previously added) The method of claim 72 in which the device is part of the commodity.

92. (previously added) The method of claim 72 in which the device stores a script for probing a user for value information.

93. (previously added) The method of claim 92 in which the device receives the script from the server.

94. (previously added) The method of claim 72 in which the value information guides the users interaction with the commodity.

Attorney's Docket No.: 03058-004002

95. (previously added) The method of claim 72 in which the event is a user request.

96. (previously added) The method of claim 91 in which the event is an exception resulting from use of the commodity.

Claims 97-101 are canceled without prejudice.

102. (previously amended) A system comprising a server that is electronically accessible to multiple client systems;  
the server storing value information indicative of the values of respective products, services, software, or information as determined by users of the products, services, software, or information, and

software configured to:

receive value information electronically from the client systems regarding what would make a product, service, software, or information valuable,  
store the received value information, and  
in response to a trigger from one of the client systems, distribute the stored value information for the product, service, software, or information electronically to the one of the client systems, wherein the trigger is a function of a customer valuation of the respective product, service, software, or information.

103. (previously added) The method of claim 72 in which the information received by the client device comprises navigational pointers.

104. (previously added) The method of claim 72 in which the information received by the client device comprises hypertext.

Claims 105-116 are canceled without prejudice.
